

Drought Tolerant Plants

The following list has been compiled for the benefit of our customers. Here you will find a list of plants that we normally stock, which we consider to be drought-tolerant. The information contained in this list was compiled from various reputable sources. However, we cannot guarantee the accuracy of this information. Also be advised that drought-tolerant plants still require water. Under certain circumstances other plants, not in this list, may also be able to survive on less water after being properly established. If there is something you want that is not on the list please call the nursery at (509) 662-2036.
